

Datasheet: 2150-1948

Description:	RABBIT ANTI RAT COLLAGEN III
Specificity:	COLLAGEN III
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Frozen	▪			1/20
Immunohistology - Paraffin	▪			
ELISA	▪			1/3000
Western Blotting			▪	
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

Target Species	Rat
Product Form	Purified IgG - lyophilised
Reconstitution	Reconstitute with 0.5 ml distilled water. Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution.
Antiserum Preparation	Antiserum to rat collagen type III was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography on immobilized rat collagen type III.
Buffer Solution	Phosphate/Borate buffered saline.
Preservative	1% Mannitol
Stabilisers	1% Dextran
Approx. Protein Concentrations	0.1 mg/ml after reconstitution
Immunogen	Collagen type III from rat tail tendon.

Specificity

Rabbit anti Rat Collagen III antibody recognizes rat collagen type III, binding to both native and heat denatured collagen type III. This antibody is reactive with rat kidney, liver, skin and heart, but does not stain basement membranes.

The antiserum was cross-absorbed with immobilized rat serum proteins.

Storage

Prior to reconstitution store at +4°C.
After reconstitution store at -20°C.
Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody.

Shelf Life

12 months from date of reconstitution.
